SUMMARY

I am a Business Management undergraduate at Manchester Metropolitan University, expected to graduate in 2027, with practical Python software experience across APIs, data validation, automated testing, and cloud delivery. I have built FastAPI/PostgreSQL business systems and an AWS-deployed sales-lead bot using TallyPrime product data and Kafka-queued Bahrain web scraping; it is being rolled out to 3 salespeople for prospecting and new-customer acquisition. I have deployed the services on AWS with Docker and Kubernetes, served them through Nginx, and used GitHub Actions for CI/CD.

TECHNICAL SKILLS

Languages: Python, SQL
Backend: FastAPI, Flask, REST APIs, Pydantic, SQLAlchemy, Alembic
Testing & version control: pytest, automated testing, Git
AI tools: Claude, Cursor (used AI agents to review code and write tests)
Infrastructure & delivery: AWS, Docker, Kubernetes, Nginx, GitHub Actions (CI/CD)
Data & messaging: PostgreSQL, Redis, Kafka, pandas

WORK EXPERIENCE

Manchester Metropolitan University **Oct 2026 - Present**
Part-time Student Record Quality Specialist *Manchester, UK*
- Wrote Python and pandas scripts to flag duplicates, missing values and formatting errors in student record exports.
- Validated date formats, required fields and matching IDs in each new batch before manual review.
- Resolved data issues with university teams and tracked fixes.
- Handled sensitive student data under GDPR and university policy.

WhiteLight Trading **Jun 2026 - Jul 2026**
Software Engineer Intern *Bahrain*
- Mapped sales, delivery and collections with the CEO and operations manager, identifying stock-outs, slow receivables and communication gaps; built FastAPI/PostgreSQL stock and receivables systems and contributed to mobile-sales workflows.
- Built an AWS-deployed FastAPI sales-lead bot using TallyPrime product data and Kafka-queued Bahrain web scraping; it is being rolled out to 3 salespeople for prospecting and new-customer acquisition.
- Deployed the services on AWS with Docker and Kubernetes, served them through Nginx, and used GitHub Actions for CI/CD.
- Wrote development tests for customer matching against company records, covering duplicate and distinct-company cases.

PROJECTS

Gym Social Media API | github.com/mohamedalsayed12/gym-social-media
FastAPI, PostgreSQL, SQLAlchemy
- Built a social-feed API with registration, JWT login, posts, search, pagination, voting and ownership checks for edits/deletion.
- Added Alembic migrations, pytest for auth/post actions, Docker Compose and GitHub Actions CI.
- Used AI agents (Claude, Cursor) to review the code and write and run tests for the API.

Nutrition Tracker API | github.com/mohamedalsayed12/nutrition-tracker
Flask, PostgreSQL, SQLAlchemy
- Built authenticated food/activity and nutrition-goal APIs with daily/weekly reports, USDA search and server-side nutrient calculations.
- Separated routes, validation, services and models; added migrations, Docker, OpenAPI docs and automated tests.

EDUCATION

BA (Hons) Business Management, Manchester Metropolitan University | Expected: 2:1 **2025 - 2027**
Administrator, AI Society
Business Management, Keele University **2024 - 2025**

CERTIFICATIONS

Complete Python Developer in 2026: Zero to Mastery **Aug 2026**
Complete SQL + Databases Bootcamp: Zero to Mastery **Aug 2026**
